

(Japan) MBS Global Insight Seminar: Economic Growth in Asia

Economic growth in developing Asian countries

This seminar will consider the pattern of economic growth to maturity observed in the US and Japan in recent decades and compare this experience to the process currently underway in China.

- Is growth necessary? What are the consequences of a low growth / no growth world economy?
- What are the effects of changing demographics on growth and what are the consequences for aging Asian populations?
- Is there really a pattern in national growth, or is this time different?
- Are there opportunities in the later stages of growth?
- After America, Japan and China, which will be the next great growth story?

Date & Time:	Friday 15 April 2016 6:45pm - 9pm (6:45pm Networking; 7pm Seminar)
Venue:	Room 601, Tokyo Conference Station (map)
Fee:	JPY 1,000 per person. Pay at the door.
Registration:	Seats are limited. First-come, first-served basis by Register NOW

Professor Charles Schell, Visiting Fellow, Manchester Business School

Prior to joining Manchester Business School in 1989, Charles worked as a consultant in Asia Pacific. He has taught strategy and finance subjects on all of MBS's MBA programs and in 1990s directed the flagship International Business Projects funded by major multinationals. In 1992 he was part of the group that founded MBS Worldwide Global MBA Programmes and as coordinator of the International Business Strategy course for over 20 years.

Charles has worked individually, with colleagues and past students on a variety of major consulting jobs. Past clients have included the European Union (TACIS), the governments of the UK, Canada and Brunei, and various multinational corporations eg Pfizer, IBM, Shell, Prudential, Accenture, and financial institutions eg Bank of Scotland, Banque Indosuez, ING Bank, Barclays Bank, KPMG, Price Waterhouse Coopers, Arthur Anderson.
